Remote Start Systems

Warm in the Winter, Cool in the Summer

Tired of your vehicle being too hot in the summer and too cold in the winter? Stellar's Remote Start units allow you to unlock, lock, start your vehicle, or trigger a custom function all by remote control.

Units can automatically turn on your A/C or heater on hot or cold days. Stellar Remote Start Systems have an Anti-Grind feature plus adjustable crank time which eliminates wear and tear on your starter and engine. Stellar also offers remote start systems with security features.

STRS9750

You can't turn down this complete security and remote start system! It is jam-packed with sophisticated features that ensure your vehicle's protection and comes with the same state of the art remote start and security system that is offered by the STRS9950. Code learning technology protects your vehicle from high-tech thieves. With fully programmable settings, you can custom tailor the STRS9750 to your needs. Stellar's Status Memory System recalls system settings and status if power is ever disconnected. The STRS9750 contains many more security system features.

STRS9950/STRS9960

The STRS9950/STRS9960 are jam-packed with sophisticated features that ensure your vehicle's protection and comes with Stellar's state of the art remote start system with anti-grind and auto-restart features. Features code learning technology protects your vehicle from high-tech thieves. With fully programmable settings, it can be custom tailored to suit your needs. Stellar's Status Memory System recalls system settings and status if power is ever disconnected. Fully adjustable shock sensor features fuzzy logic programming, "warn first" mode, and 6 zones of protection. The STRS9950/STRS9960 contains many more security system features.

RS5000

This remote start system features the same state of the art remote start system offered by the STRS9750, but without the vehicle security features.

RS6000

This remote start system features the same state of the art remotes and remote start system as the STRS9950 offers, but without the vehicle security features.

BMW Security & Keyless Entry Systems

Direct Plug-In Units

Stellar's new code-hopping alarms plug into your 1992-2002 [excluding E46] BMW's factory port to protect your investment. Stellar Alarms plug directly into your factory port and do not require any additional wiring. Stellar Alarms offer many features not available on the BMW factory alarm at a fraction of the price. The BMWSTX & BMWRTX features ignition locking, built-In adjustable shock sensor, extreme reliability and much more!

For added convenience, the accessory button on the remote can work with all of Stellar's other BMW accessories, giving you the option of a remote trunk latch, remote start, remote convertible top, and more! Easy installation and backed by a Limited Lifetime Warranty.

Go Keyless!

Stellar's new Keyless Entry unit plugs into your BMW's factory port for added convenience. Why pay over $400 for a factory alarm when all you want to do is simply lock and unlock your BMW by remote? The BMW45P model plugs right into your factory harness. It can double lock all doors and flash the parking lights. The BMW45P-C model adds remote window operation. The BMW45 model is a hard-wire kit specifically designed for older '75 to '91 BMWs.

Security Accessories

Dual Head Ultrasonic Sensor

Get the ultimate in protection for your vehicle! This ultra sonic sensor package fills the cabin of your vehicle with invisible ultrasonic waves. Any intrusion that interrupts these invisible waves will trigger your alarm system.

UT1000 #200579

Glass Sensor

This high quality sensor will trigger your alarm system when the thief attempts to gain entry by smashing your windows. Fully compatible with all Stellar alarm systems with an optional sensor port. Limited Lifetime Warranty.

GS1 #103238

Remote Cases

Show off your advanced technology! Choose between 3 great looking remote cases for any 4 button remote. All optional colored remote cases are made of high impact plastic. Available in clear, blue and chrome.

4BRCCL #129016 Clear Face Plate
4BRCBL #129030 Blue Face Plate
4BRCGR #129023 Silver Face Plate
TR3 #10518 3 Button Replacement Remote
TRLCD #11716 LCD Button Replacement Remote

Radar Motion Sensor

Upgrade your alarm system to the ultimate dual stage sensor. When an intruder comes near your vehicle the sensor will trigger a warning chirp (stage 1). If the sensor detects motion within the vehicle while your system is armed, it will trigger the alarm system (stage 2). Fully adjustable.

RM2000 #105683

Battery Back Up Siren

Employs the latest compact power cell technology. If the alarm system's power source has been disconnected, the siren will remain active and functional. The BKSR is housed in a weatherproof housing. Easy installation.

BKSR #140943

Vehicle Tilt Sensor

Got a set of valuable wheels installed on your vehicle? This high quality tilt sensor will provide you with the level of protection you need to secure your investment. When armed, it will monitor any tilting of your vehicle and trigger your alarm to ward off any would-be thieves. Easy Plug 'n' Play installation when used with any Stellar alarm system.

TL1000 #140950

Laser Warning

Stellar laser security display informs everyone that your vehicle is armed with the ultimate security system. Can project up to 20 feet, and offers a flexible pointer. Works with all Stellar BMW alarms and comes with detailed instructions.

BMWLZ #10942

stëllar
automotive security systems

Back-up Warning Systems

Available in Standard, Deluxe, and Wireless

Stellar's Back-Up Warning System sends ultrasonic waves into the space behind your vehicle when it's in reverse to detect and warn you of any objects that are hidden from your view. A sequence of pulse tones are emitted to warn you of any such objects. The frequency of the pulse tones indicate how close your vehicle is to those objects. As your vehicle travels closer to that object, the pulse tones become more and more rapid. This is a feature found on many luxury European sedans. It is also great for Vans & SUV's as well. Now you can have it too! Comes complete with detailed instructions to insure easy installation. Ensures convenience and safety. Backed by a Limited Lifetime Warranty.

Stellar™ Keyless Entry Systems

stellar
automotive security systems

Hands-Free Keyless Entry System
with proximity sensor

No Hands! Using the same RFID technology found in secret government programs, you can now unlock and start your car with no keys, push-button fobs or other cumbersome devices. Simply walk up to your car, and the doors unlock when you're in a predetermined range while simultaneously enabling your push button start. Walk away from your car and the doors lock and the ignition circuit is disabled for the ultimate in vehicle security.

HF1000 #10118

Why wait for the future when you can have it right now?

Ultimate Security   Ultimate Simplicity

*penny not included. Shown to indicate size.

Now with the FlipKey!

Go Keyless

From one four button remote you can unlock and lock your doors, pop the trunk or hood, open/close your sunroof, roll your windows up and down, turn on your headlights, neon, dome light, alarm, operate your stereo, or anything else you can think of. With 18 channels of accessory outputs, you can remotely control just about everything on your vehicle.

Each of the 18 available channels offers programmable pulse times, allowing you to choose between pulse, constant, and latching outputs. System features include visual parking light confirmation, long range remote controls, and an exclusive shaved door handle mode. Each system is backed by a Limited Lifetime Warranty.
